### Professional Profile / Objective

An IT specialist with a passion for Cyber Security, networking and a proven ability to work well under pressure. A graduate from Swinburne TAFE (Certificate IV in Information Technology) and currently studying for my CompTIA Security + and CCNA, I am seeking to apply my skills and knowledge in an industry context. Highly motivated and a self-starter, I am eager to continue to develop my knowledge and improve the practical application of my skills in cyber security and networking.

### Key Skills

- Cyber Security -
- Networking - a strong understanding of networking fundamentals, IP services, security fundamentals, automation and programmability
- Programming – practical skills in design and code programs using popular languages such as Python, C# and JavaScript, ability to design, build and implement database systems

- OSI and TCP/IP Model

- IPv4/IPv6

- LAN/WAN

- VLAN/Trunking

- STP/RSTP

- OSPF

- FHRP

- Etherchannel

- NAT

- Qos

- Wireless and WLC

### Programming Languages

- HTML5 (good)
- CSS (good)
- Javascript (basic)
- C# (good)
- Python (basic)
- SQL (good)
- TSQL (good)

### Operating systems

- Linux (*good*)
- Windows10 (*strong*)

- Mac (*basic*)

### Software

- Microsoft Suite: Excel, Access, Word, Powerpoint, Project (*good*)
- Networking: TrueNas, NextCloud, WireShark, GNS3, Packet tracer
- Virtual Machines: VMware, virtual box,
- Coding: Visual Studio Code, Enterprise Architect, draw.io, postman
- Security: Putty, puttygen, filezilla, Tor, BRUP suite, vnc viewer, RDP

### **Soft Skills**

- Proven ability to work under pressure
- Problem Solving
- Time Management
- Teamwork
- Adaptability
- Project Management

### **Projects & Hobbies**

- Good knowledge of computer hardware and troubleshooting including setting up personal DNS Server with Raspberry Pi (Pi Hole) and local server with TrueNAS
- Enjoy ethically exploring Hak5 hardware including WIFI Pineapple, Bash Bunny, LAN Turtle, Shark Jack, Key Croc, Screen Crab, Packet Squirrel
- Good understanding of Virtual Machines including working with VMware Workstation Pro, cloning a snapshot VM, installing and importing OVF & OVA files
- Managing virtual networks

### **Education and Qualifications**

Certificate IV in Information Technology

2020 Swinburne TAFE

Certificate IV in Cyber Security

2021 Swinburne TAFE

Comptia Security+

2022 Currently studying

CCNA

2022 Currently studying

### **Additional Information**

Previous career: 13 years working as a professional chef (France and Australia)

Languages: French (first language), English (advanced)

Interests: Gaming

### **References**

References are available on request

## Guff

Love learning new skills and information every day. Not afraid to do the research needed to increase my knowledge and abilities.

- Ability to work independently or as part of a team
- Success at respecting and meeting deadlines
- Attention to detail and quality
- Knack for juggling multiple tasks and priorities

*Passionate IT graduate from the Illinois Institute of Technology with 5 months of experience in database administration. Seeking to use proven skills in JavaScript and C++ to meet business plans at Acme Inc.*

- Include languages and think about ranking them in proficiency

### Other things to include

- Programming languages
- Operating systems
- Protocols
- Hardware/software
- Methodologies

- Thirst the learn new skill.

Proven ability to work under pressure (I embrace working under pressure, being responsive and adaptive in planning to keep up with deadlines)

## LinkedIn About

I'm an IT specialist with a passion for Cyber Security, ethical hacking, networking and a proven ability to work well under pressure.

After graduating from Swinburne TAFE in 2020 with my Certificate IV in Information Technology, I decided to focus my attention to cyber security and then 'you-know-what' hit, so whilst in lockdown I used this time to start studying for my CCNA and CompTIA Security + (current). In my spare time, when I'm not running around after my small child, I use Hack The Box and Try to Hack Me to deepen my knowledge of ethical hacking.

My 13 years of professional experience a chef, both in Europe and Australia, demonstrates that I can work well under pressure and have excellent time management skills. I am focussed, highly motivated and eager to continue developing my knowledge in cyber security and networking.

Changing carrier to the Cyber industry, Looking forward to connect with you.
